1. Remove dust cover from YDIS connector and Bullet connector on engine.
2. Connect Flash Loom to YDIS connector and Bullet connector as per images below

3. Connect the other end of the Flash Loom to Woolich Flash Box in the typical way for all ECU Harnesses.
4. Turn the ignition on (Key On, Engine not running)

- 6. Click 'Read ECU' from the main menu, the ECU should now be read out.
- 7. WRT will advise the ECU is unrecognised and ask you to send to Woolich. Agree to the prompts.
- 8. Fill in the form presented with 'Nizpro' entered in the support ticket field and comments field.
- 9. Email [sales@nizpro.com.au](mailto:sales@nizpro.com.au) once the file has been submitted so we can request it from Woolich.
